

Senate

Office of the Secretary

NINETEENTH CONGRESS OF THE )  
REPUBLIC OF THE PHILIPPINES )  
First Regular Session )

22 JUL 14 P2:17

SENATE  
S. No. 620

RECEIVED BY.

Introduced by SENATOR FRANCIS "TOL" N. TOLENTINO

**AN ACT**

**EXPANDING THE DEFINITION OF "MEDICAL DEVICE" TO INCLUDE HEALTH APPLICATIONS, FURTHER AMENDING REPUBLIC ACT NO. 3720, OTHERWISE KNOWN AS THE "FOOD, DRUG, AND COSMETIC ACT," AS AMENDED BY REPUBLIC ACT NO. 9711, OTHERWISE KNOWN AS THE "FOOD AND DRUG ADMINISTRATION (FDA) ACT OF 2009," AND FOR OTHER PURPOSES**

**EXPLANATORY NOTE**

Software and mobile applications have become a useful tool in improving one's health. They can help boost over-all health and well-being and provide valuable health-related information. These applications or "apps," which are easily downloadable and readily available in app stores, address a wide variety of health-related aspects, such as nutrition, sleep, physical exercise, stress management, and medication trackers and/or reminders.

Thus, the prevalence and impacts of the mobile health industry, also known as "mHealth," have become undeniable. In 2017, in the United States alone, over 318,000 health apps were already readily available in top app stores, with more than 200 apps being added each day.<sup>1</sup> In fact, the number of consumer digital health apps ballooned in 2020 with more than 90,000 new ones. The Global Mobile Health

(mHealth) Market Insights and In-Depth Analysis 2020-2027 forecasts that the value of the mobile health industry will exceed \$311.98 Billion by 2027.<sup>2</sup>

In the Philippines, the health industry has also gone digital with the launching and utilization of health-related mobile applications. They are convenient, affordable, and easily accessible to consumers. Digital healthcare ranges from online medical consultation or telemedicine apps to health assessment and monitoring apps for both physical and mental health. Currently, the primary use for health apps is for contact-tracing, which is a key public health intervention against the novel Coronavirus 2019 disease (COVID-19) as these apps break the chain of transmission by identifying and isolating persons who came into contact with an infected individual.

The use of contact-tracing apps has been effectively utilized by other countries in battling the COVID-19 pandemic, such as Singapore with its TraceTogether app, Germany with its Corona-Warn-App, Australia with its COVIDSafe app, and France with its StopCovid app.<sup>3</sup>

In the Philippines, the application StaySafe.ph was launched as the official contact tracing program of the government. It has been described as a game-changer in the fight against COVID-19. As of 10 September 2020, there were two million Filipinos and some 3,000 businesses registered under the StaySafe.ph app.<sup>4</sup>

Indeed, digital health technologies are valuable tools in the management of the COVID-19 response by helping public health officials reach and deliver information to a vast number of people more quickly, efficiently, and effectively. However, the definition of medical devices under Republic Act (R.A.) No. 3720, as amended by R.A. No. 9711, remains outdated and archaic in contrast to the rapid

<sup>4</sup> About 2 million Filipinos now registered in contact tracing app dated September 10, 2020, CNN Philippines; accessed at <https://www.cnnphilippines.com/news/2020/9/10/staysafe-contact-tracingapp-users-about-two-million-filipinos.html>

advances of technology in the medical field. The law does not sufficiently contemplate applications and digital platforms which have become an integral part of medical products.

Hence, there is an urgent need to amend the law. If software and mobile medical applications remain unregulated, the diagnosis, treatment, or prescription of medicines through these applications could potentially result in life-threatening consequences. Moreover, without proper licensing and registration, claims against medical malpractice and civil liabilities could be painstaking and difficult.

This bill seeks to further amend R.A. No. 3720 in order to redefine the term "medical device" to emphasize the inclusion of software and health applications under such definition and clarify the jurisdiction of the Food and Drug Administration (FDA) over such medical devices.

In light of the foregoing, the passage of this bill is earnestly sought.

**FRANCIS "TOL" N. TOLENTINO**

1 diagnosis, prevention, monitoring, treatment or alleviation of  
2 disease; diagnosis, monitoring, treatment, alleviation of, or  
3 compensation for an injury; investigation, replacement, modification,  
4 or support of the anatomy or of a physiological process; supporting  
5 or sustaining life; preventing infection; control of conception;  
6 disinfection of medical devices; and providing information for  
7 medical or diagnostic purposes by means of in-vitro examination of  
8 specimens derived from the human body. This device does not achieve  
9 its primary intended action in or on the human body by pharmacological,  
10 immunological, or metabolic means but which may be assisted in its  
11 intended function by such means.

12 x x x"

13 **Section 2.** Section 10 of RA No. 3720, as amended, is hereby further amended  
14 to insert a new subsection (nn) to read as follows:

15 "SEC. 10. For the purposes of this Act, the term:

16 x x x

17 **(NN) "SOFTWARE OR HEALTH APPLICATION" AS USED IN THIS ACT,**  
18 **MEANS A MEDICAL DEVICE THAT CAN BE INSTALLED AND/OR**  
19 **OPERATED ON MOBILE PHONES, TABLETS, COMPUTERS, OR ANY**  
20 **OTHER COMMERCIAL OFF-THE-SHELF COMPUTING PLATFORM, WITH**  
21 **OR WITHOUT WIRELESS CONNECTIVITY. ITS FUNCTIONS SHALL**  
22 **INCLUDE, BUT ARE NOT LIMITED, TO ANY OF THE FOLLOWING:**

23 **(1) CALCULATE MEDICINE DOSES FOR THE USER;**

24 **(2) DIAGNOSE A MEDICAL CONDITION OR DISEASE;**

25 **(3) GIVE THE USER AN INDIVIDUAL PERCENTAGE RISK SCORE**  
26 **OF HAVING A MEDICAL CONDITION OR DISEASE;**

1           **(4) PRESCRIBE CURE, MITIGATION, TREATMENT, OR**  
2           **PREVENTION OF DISEASE; OR**

3           **(5) DETERMINE CONTACT BETWEEN AN INFECTED PERSON AND**  
4           **A USER.”**

5           **Section 3. *Separability Clause.*** - If any provision of this Act is declared  
6           unconstitutional or invalid, other sections or parts not affected thereby shall remain in  
7           full force and effect.

8           **Section 4. *Repealing Clause.*** - All laws, decrees, executive orders, rules,  
9           and regulations, or parts thereof, inconsistent with the provisions of this Act are  
10          hereby repealed, amended, or modified accordingly.

11          **Section 5. *Effectivity Clause.*** - This Act shall take effect fifteen (15) days  
12          after its publication in the *Official Gazette* or in a newspaper of general circulation.

*Approved,*
